FOR PARENTS

How to choose a licensed child care provider

CONNECTICUT
Early Childhood

HELPFUL TIPS FOR PARENTS

Choosing a child care program is one of the most difficult and important decisions you will ever make for your child. The following are tips on what to consider when choosing a child care program. The **Connecticut Office of Early Childhood (OEC)** is responsible for licensing and regulating child care programs in Connecticut.

DETERMINE IF THE PROGRAM IS LICENSED

Find a licensed care provider near you by dialing **211** or visiting **211childcare.org**.

VISIT THE PROGRAM

Try to visit when children are present, prior to enrolling your child. After enrollment, make unannounced visits at different times during the day. Licensed programs are required to give parents of enrolled children access during hours of operation. Ask to see the most recent OEC inspection report or refer to **211childcare.org** to view the last five years of inspection and/or complaint history.

OBSERVE STAFF INTERACTION

- Are staff members friendly and comfortable with the children?
- Do they encourage conversation and play?
- Do they allow the children to make choices?

Children should be supervised at all times. Child care centers are required to have at least 1 staff for every 4 children under age 3, 1 staff for every 5 two-year-olds, 1 staff for every 10 children over 3, and 1 staff for every 15 school-age children. Family providers generally are licensed to care for up to 6 full-time children and 3 before and after school children with only 2 being under the age of 18 months, unless an approved assistant or substitute is present.

CONSIDER HEALTH AND SAFETY

- Is the program clean and safe?
- Are potentially hazardous substances kept away from children?
- Are there clean and sanitary diapering areas?
- Is the playground free of hazards?
- Does the program have emergency plans?

ASK QUESTIONS

- Are the staff qualified?
- How many children are in your care?
- Are there working smoke and carbon monoxide detectors?
- Can children with special needs be accommodated?
- What is a typical day like?
- Are staff trained to administer medications?
- What discipline methods are used at the program?
- Does the program have emergency plans?

Ask if they have a parent handbook with policies on topics such as hours and days of operation, administration of medications, fees, emergencies, behavior management, and meals and snacks.

ASK FOR REFERENCES

Ask the program for names of current or previous families whom you can contact for information about their experience at the child care program.
