

# GUIDANCE FOR YOUTH CAMPS

---

During COVID-19

Connecticut Office  
of Early Childhood

3.31.2021

# TABLE OF CONTENTS

## Note to Camps

### Assumptions

**Section 1:** Connecticut Requirements for Youth Camps During COVID-19

**Section 2:** Mask-Wearing

**Section 3:** Social Distancing & Group Size

**Section 4:** Drop-off & Pick-up Procedures

- ◆ Transportation

**Section 5:** Health Screening Procedure

- ◆ Details Related to Supplies

**Section 6:** Cleaning & Disinfecting

- ◆ Overall Surface Cleaning
- ◆ Cleaning and Disinfecting Outdoor Areas

**Section 7:** Suggested Sick Procedures

- ◆ Sick Children and Staff Shall Stay Home
- ◆ If Someone Is or Becomes Sick While at Camp
- ◆ Monitor and Plan for Absenteeism Among Staff
- ◆ If COVID-19 Is Diagnosed in a Child or Staff Member
- ◆ If a Child or Staff Member is Exposed to COVID-19
- ◆ Vulnerable/High Risk Groups
- ◆ COVID-19 Vaccine

**Section 8:** Ventilation

**Section 9:** Facilities & Pools

- ◆ Water Systems
- ◆ Cleaning and Disinfecting
- ◆ Pools

### Resources & Sources

### Checklist

## NOTE TO CAMPS

---

We greatly appreciate the challenges all Connecticut youth camps are facing due to the current COVID-19 public health emergency. Thank you for your continued dedication. We value you and aim to supply you with all of the information you need to continue to provide critical services at this time.

We recognize that deciding whether to operate is a very difficult decision that must be made at the provider level. Individual programs must determine what is best for them given guidance from the Centers for Disease Control and Prevention (CDC), local authorities, and individual business decisions.

The policies and guidance in this document are specific to the COVID-19 pandemic. Unless otherwise specified, all licensing regulations and other requirements still hold firm.

Youth camps should continue to review the memos issued by the OEC that provide important guidance for youth camps, including waivers of licensing requirements during the declared state of emergency, additional requirements imposed through Executive Orders that must be met during this emergency, and resources to support programs during and following the emergency. These memos can be found at [ctoec.org/covid-19](https://ctoec.org/covid-19). It is important to understand that the COVID-19 emergency is a changing situation, and as the CDC and/or State of Connecticut guidance changes, the OEC will update guidance to providers.

For a list of Frequently Asked Questions, please visit [ctoec.org/covid-19/covid-19-frequently-asked-questions-faq/](https://ctoec.org/covid-19/covid-19-frequently-asked-questions-faq/).

We cannot thank you enough.  
Connecticut Office of Early Childhood

# ASSUMPTIONS

**The Office of Early Childhood (OEC) has created this guidance based upon the following assumptions:**

- ◆ Emergencies present themselves at all times and in many forms. Camp programs must be prepared to respond to major threats, including severe weather and human-caused emergencies, as well as infectious and viral threats like the current COVID-19 crisis.
- ◆ OEC is informed by recommendations from the Centers for Disease Control and Prevention (CDC), the American Academy of Pediatrics (AAP), and public health entities because OEC is not a health-based organization. Specific verbiage has been taken from CDC and Connecticut Department of Public Health (DPH) guidelines.
- ◆ All licensed youth camps will continue to meet all **licensing requirements**.
- ◆ The health and safety of children, families, and camp staff is a priority.
- ◆ Health and safety practices that are necessary to mitigate the spread of COVID-19 must be implemented in a manner that maintains trusting relationships between providers, children, and families; and supports child development and well-being.

# CONNECTICUT REQUIREMENTS FOR YOUTH CAMPS DURING COVID-19

## OEC has issued the following requirements for all youth camps to reduce the risk of spreading the virus.

This guidance can also be found on the [OEC COVID-19 Website in Memo #18 Revised](#). All guidance is based upon advice from the CDC, DPH, and the Governor's Office.

- ◆ All staff must use face coverings at all times.
- ◆ All children age 3 years and older must use face coverings unless they are eating, drinking, or are outdoors. *Distance between children must be maximized when masks are removed.*
  - ◆ NOTE: See [Memo #18 and #29 Revised](#) for more specifics on mask-wearing for children.
- ◆ Maintain groups of 20 or fewer per space. (As of March 29, 2021)
  - ◆ NOTE: Children should stay in the same group each day so that, if an outbreak should happen to occur, only one group of children is impacted, instead of the entire program.
- ◆ Screen staff and children for any observable illness, including cough or respiratory distress, prior to entering the camp (see [Section 5: Health Screening Procedures](#)). Also follow travel related advisory from the Department of Public Health.
- ◆ Exercise enhanced cleaning and disinfection.

### PRACTICE FREQUENT HANDWASHING FOR AT LEAST 20 SECONDS

Before coming in contact with any child.

After sneezing, coughing, or nose blowing; before handling food and eating; after using the restroom; touching or cleaning surfaces that may be contaminated; and using any shared equipment like toys, computer keyboards, or mouse.

Help children practice frequent handwashing.

If soap and water are not available, use a 60%+ alcohol-based hand sanitizer.

- ◆ All staff shall cover their mouths with their sleeve or a tissue when coughing or sneezing, and encourage children to do the same; and dispose of soiled tissues immediately after use.
- ◆ Avoid touching the eyes, nose, or mouth with hands.
- ◆ Ensure anyone showing signs of sickness stays home.
- ◆ Implement social distancing (see [Section 3: Social Distancing & Group Size](#)).

# MASK-WEARING

## All staff and children age 3 years and older must use face coverings.

- ◆ Face coverings shall not be placed on young children under age 2; anyone who has trouble breathing; or anyone who is unconscious, incapacitated, or otherwise unable to remove the mask without assistance.
- ◆ Those with medical conditions are not required to wear a mask.

### FACE COVERINGS SHALL

fit snugly but comfortably against the side of the face.

allow for breathing without restriction.

if multiple use, be able to be laundered and machine dried without damage or change in shape; or if a material other than fabric, shall be otherwise appropriately maintained.

be secured with ties or ear loops.

include multiple layers as appropriate, as with fabric masks.

- ◆ Individuals shall be careful not to touch their eyes, nose, and mouth when removing their face covering, and wash hands immediately after removing.
- ◆ Face coverings recommended are not surgical masks or N-95 respirators; those are critical supplies that must continue to be reserved for healthcare workers and other medical first responders, as recommended by current CDC guidance.

## MASK-WEARING CONTINUED

- ◆ For children age 3 years and older, consider dedicating a specific place for them to cleanly store their masks during snack time, lunch, and outdoor play.
- ◆ Camps must create a written policy for mask-wearing, and provide it to staff and families. For more information, please refer to **Memo #29 Revised**.
- ◆ Children shall not be excluded from the program or isolated from their peers due to the child's non-compliance with mask-wearing.

### The exceptions to the mask requirement in camp settings include:

- ◆ A child with a documented medical condition, special health care need, or developmental need (e.g. sensory integration) for whom wearing a mask or face covering would be contrary to their health or safety is not required to wear a mask.
  - ◆ A child with a documented disability or special education need for whom wearing a mask or face covering would be contrary to their needs may be permitted exceptions. In addition, children and staff involved with certain special education and related services activities, like speech and language therapy or where lip reading is required, may remove a face covering mask intermittently.
  - ◆ Children are not required to wear a mask while eating, sleeping, or resting. Distance between children must be maximized when masks are removed.
  - ◆ Mask breaks may be planned and scheduled throughout the day. Mask breaks indoors must maximize physical distance between individuals, maintaining at least 6 feet of distance wherever possible.
  - ◆ Masks may be removed for outdoor activities.
- 
- ◆ Camps may consider including education for children, families, and staff about proper mask-wearing, proper mask removal, mask storage, mask washing, and mask disposal.

## SOCIAL DISTANCING & GROUP SIZE

### Determine strategies appropriate for your camp and consider the following measures for social distancing:

- ◆ If possible, groups of children shall be the same each day, and the same staff members shall remain with the same group each day.
- ◆ Alter or halt daily group activities that may promote transmission.
  - ◆ If feasible, limit the amount of shared supplies and equipment for activities by providing participants with their own (e.g. life jackets, art supplies) for the duration of camp.
  - ◆ Limit the mixing of children by staggering times on activity fields, in dining halls, etc.
  - ◆ Space children, ideally 6 feet apart, during meal or snack times.
- ◆ Maintain groups of 20 or fewer per space. (As of March 29, 2021)
- ◆ In order to limit the number of people that individuals are exposed to, camp programs may want to consider having 2 staff assigned to each group of children on a regular basis.
- ◆ Camps shall comply with the requirements listed in the **Department of Economic Development Safe Workplace Rules for Essential Employees** per **Executive Order 7BB**.

We are aware that working in these settings during this emergency is a challenge. There are risks and we trust that staff and families will work together to maintain the health and safety of the children in your care.

# DROP-OFF & PICK-UP PROCEDURES

**Drop-off and pick-up procedures shall be altered and reviewed with families. These procedures reduce exposure, and help keep children and staff safe.**

Hand hygiene stations shall be set up at the entrance of the camp if possible, so children can clean their hands before they enter.

- ◆ If a sink with soap and water is not available, provide hand sanitizer with at least 60%+ alcohol next to parent sign-in sheets.
- ◆ Keep hand sanitizer out of children's reach and supervise use.
- ◆ If possible, staff shall sign children in and out of care. When families are doing so, encourage them to use their own pen.
- ◆ If possible, place sign-in stations outside, and provide sanitary wipes for cleaning pens between each use.

---

### Consider staggering drop-off and pick-up times, and limit direct contact with parents as much as possible.

- ◆ Have families drop children off outdoors when possible so that they do not need to walk through the building.
- ◆ Have camp staff greet children outside as they arrive, and limit direct contact between parents and staff members, adhering to social distancing recommendations.
- ◆ Access to the camp shall be limited.
- ◆ Ideally, the same parent or designated person shall drop-off and pick-up the child every day.
- ◆ If possible, individuals at higher risk shall not drop-off or pick-up children, because they are more at risk for **severe illness from COVID-19** (see Section 7: Sick Procedures).
- ◆ Other people who are not necessary to the running of the camp program shall be limited.

---

### Transportation

- ◆ Prior to providing transportation at the start of the day to any child, such children shall be screened for any observable illness.
- ◆ While transporting children in care, the current guidance regarding group size, the wearing of a mask or cloth face covering, and social distancing apply.
- ◆ The groups of children shall not mix while transporting. Camp planning may consist of neighborhood groupings to allow the same grouping of children throughout the entire camp day.

# HEALTH SCREENING PROCEDURE

**All staff and children are required to be screened for any observable illness, including cough or respiratory distress. During the health screening:**

- ◆ Staff shall wash hands and wear face coverings.
- ◆ Staff shall stand at least 6 feet away from the child and parent/guardian or stand behind a physical barrier, such as a glass or plastic window, or partition that can serve to protect the staff member's face and mucous membranes from respiratory droplets that may be produced if the child being screened sneezes, coughs, or talks.
- ◆ Ask the parent/guardian to confirm that the child does not have a fever, shortness of breath, or cough.
- ◆ Make a visual inspection of the child for signs of illness which could include flushed cheeks, rapid breathing or difficulty breathing (without recent physical activity), fatigue, or extreme fussiness.
- ◆ Make sure the child has come to the program with their face mask if age 3 years or older.

In consultation with DPH, the OEC is not requiring temperature checks. However, programs may choose to continue this practice as part of their health screening. Temperature checks may increase the risk of exposure and/or transmission due to the closeness during checks and contact of individuals waiting in line. Should the program decide to conduct temperature checks, please visit the [CDC website](#) for information on temperature screening methods.

---

## Details Related to Supplies

- ◆ OEC informs camps who are open about supplies available at the OEC supported supply locations.
- ◆ The Department of Administrative Services provides a list of mostly Connecticut-based companies that can provide needed supplies (hand sanitizer, masks, and cleaning supplies) in smaller quantities at competitive prices. The list is available at <https://portal.ct.gov/Coronavirus/Pages/PPE>.

# CLEANING & DISINFECTING

## Overall Surface Cleaning

Camps shall intensify cleaning and disinfection efforts.

Camps shall develop a schedule for deep cleaning and disinfecting.

In the context of infection control, “deep” cleaning means cleaning surfaces with soap and water and then appropriately using disinfectants on high-touch surfaces. It is especially important to use proper gloves and personal protective equipment (PPE), good ventilation, and thoroughly air out the facility before children and other staff return.

**Routinely clean, sanitize, and disinfect** surfaces, and shared objects and equipment that are frequently touched, especially in between use by different groups of children.

This may also include cleaning objects/surfaces not ordinarily cleaned daily, such as doorknobs, light switches, classroom sink handles, countertops, cots, protective equipment, desks, chairs, and playground structure surfaces made of plastic or metal.

If surfaces are dirty, they shall be cleaned using a detergent or soap and water prior to disinfection.

Follow the manufacturer’s instructions for concentration, application method, and contact time for all cleaning and disinfection products.

If possible, provide EPA registered disposable wipes (a list can be found [here](#)) so commonly used technology equipment such as keyboards, desks, tablets, and accessories can be wiped down before use.

If wipes are not available, please refer to the CDC’s guidance on **disinfection for community settings**.

All cleaning materials shall be kept secure and out of reach of children.

Cleaning products shall not be used near children, and staff shall ensure that there is adequate ventilation when using these products to prevent children from inhaling toxic fumes.

## Cleaning and Disinfecting Outdoor Areas

- ◆ Camp groupings shall participate in activities at separate times.
  - ◆ Children shall wash hands before and after activities.
  - ◆ Hand sanitizer shall be available for use if a child sneezes, blows their nose, etc.
  - ◆ Programs shall have a trash receptacle for disposal of soiled tissues, gloves used during sanitizing, etc.
  - ◆ Camp programs may consider closing off areas or structures that might be hard to clean.
- ◆ Spraying disinfectants on outdoor equipment is not an efficient use of disinfectant supplies and has not proven to reduce risk of COVID-19.
- ◆ You should continue existing cleaning and hygiene practices for outdoor areas including routinely cleaning high touch surfaces made of plastic or metal, such as grab bars and railings.
- ◆ Cleaning and disinfection of wooden surfaces (play structures, benches, tables) or groundcovers (mulch, sand) is not recommended.
- ◆ Sidewalks and roads should not be disinfected; spread of COVID-19 from these surfaces is very low and disinfection is not effective.

# SUGGESTED SICK PROCEDURES

## Sick Children and Staff Shall Stay Home

- ◆ Communicate to parents the importance of keeping children home when they are sick.
- ◆ Communicate to staff the importance of being vigilant for symptoms, and staying in touch with administrators if or when they start to feel sick.
- ◆ Sick staff members shall not return to work until they have met **criteria to discontinue home isolation**.

## IF SOMEONE IS OR BECOMES SICK WHILE AT CAMP

Camps shall identify, per licensing requirements, a plan for a child or children who develop an elevated temperature or who may become ill, e.g. a “sick room.” You are encouraged to develop and review this plan with the camp physician or camp APRN prior to the start of camp. Input from your local health department is also advisable.

Clean and sanitize surfaces touched, toys, and equipment used in the areas where someone is sick (see **Section 6: Cleaning & Disinfecting**).

If a sick child has been isolated in your camp, clean and disinfect surfaces in your isolation room or area after the sick child has gone home.

## Monitor and Plan for Absenteeism Among Staff

- ◆ Develop plans to cover camp programs in the event of increased staff absences.
  - ◆ Coordinate with other local camp programs and reach out to substitutes to determine their anticipated availability if regular staff members need to stay home should they or their family members become sick.
- ◆ Recommend that individuals at higher risk for severe illness from COVID-19 (older adults and people of any age who have serious underlying medical conditions) consult with their medical provider to assess their risk and determine if they should stay home if there is an outbreak in their community.

## If COVID-19 Is Diagnosed in a Child or Staff Member

If a child or staff member who has been present in the camp is diagnosed with COVID-19, the camp must notify families and staff about the exposure.

- ◆ In February 2020, COVID-19 was added to the List of Reportable Diseases. Those required to report such diseases must **report cases of COVID-19 infection immediately to the DPH Epidemiology and Emerging Infection Program 860-509-7994 and the local department of health in the town of residence of the case-patient** by telephone on the day of recognition or strong suspicion of the disease. For weekends and after hours report to DPH **860-509-8000**. Contact information for the local health department can be found at <https://portal.ct.gov/DPH/Local-Health-Ad>.

Additional practices to those below may be recommended to the provider in consultation with the local health department or the DPH:

- ◆ Determine the date of symptom onset for the child/staff member.
- ◆ Determine if the child/staff member attended/worked at the camp program while symptomatic or during the two days before symptoms began.
- ◆ Identify what days the child/staff member attended/worked during that time.
- ◆ Determine who had close contact with the child/staff member at the camp program during those days (staff and other children) and implement steps below for child or staff member exposed to COVID-19.
- ◆ Exclude the children and staff members who are determined to have had close contact with the affected child/staff member for 10 days after the last day they had contact. For the most up to date information review **CSDE Addendum 5**.
- ◆ Conduct appropriate cleaning and disinfection:
  - ◆ Close off areas used by the person who is sick.
  - ◆ Open outside doors and windows to increase air circulation in the areas.
  - ◆ Wait up to 24 hours or as long as possible before cleaning or disinfecting to allow respiratory droplets to settle before cleaning and disinfecting.
  - ◆ Clean and disinfect all areas used by the person who is sick, such as offices, bathrooms, and common areas.

Depending on the number of children you care for and the number of people affected, partial closure or the entire camp program might need to be considered. Specific situations and exposures can be discussed with the local health department or the DPH at **860-509-7994**. For weekends and after-hours, report to DPH **860-509-8000**.

## If a Child or Staff Member is Exposed to COVID-19

- ◆ If a child or staff member who has been present in the camp program has been exposed to someone diagnosed with COVID-19 (a household member, caregiver in the home, or an individual who has had close contact for a prolonged period of time), they shall follow CDC **guidelines**.
- ◆ When COVID-19 exposure happens in a camp program, it is critical that the program be prepared for participation in contact tracing at the direction of the local health department. To support this process be prepared to:
  - ◆ Gather information such as schedules, attendance, and staffing patterns; and
  - ◆ Work with public health officials to determine messaging and exposure, need for quarantine and/or isolation, and closures.
- ◆ Consult **Memo #6 Revised** to learn more about contract tracing and things you can do to prepare yourself to support this process.

### Vulnerable/High Risk Groups

If you have staff members age 65 or older, or with serious underlying health conditions, encourage them to talk to their healthcare provider to assess their risk and to determine if they shall stay home.

- ◆ Based on currently available information and clinical expertise, older adults and people of any age who have serious underlying medical conditions might be at higher risk for severe illness from COVID-19. To protect those at **higher risk**, it's important that everyone practices healthy **hygiene behaviors**.
- ◆ Information about **COVID-19** in children is somewhat limited, but the information that is available suggests that many children have mild symptoms. However, a small percentage of children have been reported to have more severe illness.

- ◆ If you have children with underlying health conditions, talk to their parents about their risk. Follow children's care plans for underlying health conditions, such as an **asthma action plan**.
- ◆ If you have children with disabilities, talk to their parents about how their children can continue to receive the support they need.

### COVID-19 Vaccine

The **Connecticut Department of Public Health (DPH)** is the agency leading the rollout of the vaccine. To get up-to-date information on the overall vaccine distribution in Connecticut, you may visit the **state's page on COVID-19 vaccinations**.

## VENTILATION

**Ventilation plays an important part in reducing the spread of disease. Refer to Memo #29 Revised for specifics. Follow the guidance below to maximize the benefits of your ventilation system:**

- ◆ Understand what your current system is capable of and how it can be adjusted to optimize its capabilities.
- ◆ **For buildings with central ventilation systems** (e.g. air conditioning), keep the system running during all hours that the building is occupied. Do not make changes to ventilation system controls and change the filters regularly.
- ◆ **For buildings without central ventilation systems** or with areas not served by the system, consider the following:
  - ◆ When possible, windows should be opened to bring in fresh air.
  - ◆ Window air conditioning units should maximize fresh air intake into the system, if possible. Blower fans should be set on low speed and pointed away from people in the room.
  - ◆ Ceiling fans should be adjusted so fins are drawing air up toward the ceiling rather than down.
  - ◆ Window fans should be turned to exhaust air out of the window to the outdoors. Ensure fans are not blowing out of windows directly into walking paths or areas where individuals may be.
  - ◆ Do not use window fans that blow air into a room or free-standing fans that only circulate air.
  - ◆ Separate, free-standing air cleaner or HEPA filter units are not recommended, unless no other means of ventilation is available; and multiple individuals will spend their workday in an enclosed space with minimal ventilation.

# FACILITIES & POOLS

## Water Systems

Take steps to ensure that all water systems and features are safe to use if camp facilities have had long-term shutdowns prior to camp usage. This is to minimize the risk of Legionnaires' disease and other diseases associated with water. This also includes completing remediation and/or testing for lead in taps being used for drinking, cooking purposes, and brushing teeth. For more information, please refer to [CDC guidance](#).

## Cleaning and Disinfecting

Routine cleaning is sufficient for facilities that have been unoccupied for 7 days or more (see [Section 6: Cleaning & Disinfecting](#)).

## Pools

Camps may contact their local health department/districts for direction regarding the use of pools during the camp season.

# CHECKLIST

## CONNECTICUT REQUIREMENTS FOR YOUTH CAMPS DURING COVID-19

- Maintain groups of 20 or fewer per space. (As of March 29, 2021)
- Groups of children will not come in contact with other groups of children while in attendance.
- Staff have been trained to increase handwashing for themselves and the children in their care, taking at least 20 seconds for washing each time.
- Social distancing has been implemented to keep children apart outside of their individual groups.
- It has been communicated to parents and staff that all children and staff must stay home if they are showing signs of sickness.
- All staff have or will be given face coverings and know to wear them at all times.
- All children age 3 years and older know to wear face coverings at all times, except when eating or playing outside; or when keeping at least 6 feet of distance between each other.

## SOCIAL DISTANCING

- Activities have been staggered for each group of children.
- Staffing patterns will minimize movement of staff between groups of children throughout the day.

## DROP-OFF, PICK-UP, TRANSPORTATION

- Hand hygiene stations are in place, either with soap and water or hand sanitizer.
- Drop-off and pick-up times have been staggered to avoid too many families outside at once.
- Families have been told to designate one person to handle drop-off and pick-up each day (ideally no one over the age of 65 or with an underlying medical condition).
- Plans for screening and socially distancing have been developed for transportation.

## CLEANING & DISINFECTION

- Cleaning and disinfection supplies are stocked.
- A daily cleaning and disinfecting schedule including both indoor and outdoor areas is in place.
- A plan for routinely cleaning, sanitizing, and disinfecting equipment shared between individuals is in place.
- Staff has been trained in enhanced cleaning and disinfecting procedures.

## HEALTH SCREENING & SICK PROCEDURES

- Children and staff are screened upon arrival.
- Children and adults are observed for signs of illness throughout the day.
- Staff has been trained to stay home if they are sick.
- Procedures are in place for when a child or staff member starts showing signs of sickness while at the camp program.
- Plans are in place to cover for a potential absence of a staff member due to sickness.
- Staff is trained to report cases of COVID-19 to the program director to report to the local health department and DPH.
- Procedures are in place for how to address a case of COVID-19 in staff or a child in the camp program.
- Staff or teachers age 65 or older, or with underlying health conditions, have been told to contact their healthcare provider to assess their risk and determine if they should stay home.
- Families of children with underlying health conditions have been communicated with and told to contact their healthcare provider to assess the child's risk and determine if they should stay home.

## FACILITIES & POOL

- All water systems have been checked, are safe to use, and are lead-free.
- The entire building has been properly cleaned and disinfected.
