HELP KEEP US ALL HEALTHY

We are taking every precaution to keep your children safe while they are in our care. But, we need your help! By practicing the following at home, you can do your part to keep us all safe and healthy:

- Keep kids showing signs of sickness home.
- If your child needs medicine to feel better, please keep them home.
- Practice and teach good hygiene and frequent handwashing.
- Frequently clean and disinfect high-touch areas.
- Wear facemasks in public (if over 2 years old).
- Avoid touching your mouth, nose, and eyes.
- Cough or sneeze into the crook of your arm.
- Practice social distancing.
