Pyramid Pages
News & Tools for Parents & Early Childhood Providers

Social-emotional learning and development is fundamental to children’s success in school and beyond, and its importance is understood now more than ever. The Pyramid Model promotes young children’s healthy social and emotional development; and provides tools, strategies, and resources for caregivers and families.

News
Biting is a common behavior for young children, but one that must be addressed immediately. When children lack the skills or words to express themselves, they might engage in a behavior, such as biting, for several reasons:

- Frustration
- Lack of play skills
- Wanting attention
- Teething
- Overwhelming emotions

Tools
The important thing for you to remember when biting occurs is to stay calm with your actions and words, and first try to figure out the reason WHY the biting happened.

Then, you can teach children a new way to express their feelings or requests during situations when they are likely to bite. The good news is that there are many ways to reduce and to stop a child’s biting.
