

## **Supportive Interactions Checklist**

Use this checklist to evaluate supportive interactions in your program. For each item, place a check in the column that applies. Use "We've got this!" for items that are working well. Use "This is a work in progress" for your growth areas. After you complete the checklist, think about how your responses might point you to a place to start your quality improvement work.

	We've got this!	This is a work in progress
Building Trust		
Adults greet children with warm	X	
smiles and eye contact		
Adults greet children by name	X	
Adults talk to children frequently	X	
		I would like to see increased positive
Adults show interest in children's		communication between classroom staff and
independent activities		children during non-teaching times in the
		classroom.
Adults frequently check in on		We do not currently have a way to do this,
children's overall well-being		unless an enrolled child's family raises a
through observation or family		concern or shares something with us.
conversation		
Observing and Exploring		
Adults encourage children to ask		We use Creative Curriculum and that is part of
questions about their		the instruction materials.
environment		
Adults ask children questions to	X	
build on or extend their		
observations (What does that		
remind you of?)		
Adults ask children open-ended	X	
questions (What are you thinking		
about? What did you notice?)		
Adults give children time to	X	
answer questions		

Adults watch children's nonverbal		We would like to increase my staff's monitoring
behavior to monitor engagement		of children's engagement and nonverbal
activities to illeritor engagement		communication.
Extending Learning		
Adults create opportunities for	X	
children to try new activities or		
have new experiences		
Adults encourage children to	X	
guess and make predictions		
(Why did that happen? How can		
we find out?)		
Adults praise children's effort		We would like to see more adult
		communication to praise positive or desired
		behavior, rather than language used to redirect,
		instruct, or reprimand behavior that is
		concerning or challenging.
Adults model problem solving by		We would like to see classroom teachers use
sharing their own thinking		natural incidents within the teaching day to
		discuss challenges or problems and teach
		problem solving skills to children (e.g.: need to
		transition to snack time but ½ the class is not yet
		finished with the art activity, so what should
		they decide to do?).
Adults frequently reflect on the	X	
learning experiences they create		
for children
